

MICHAEL A. SABADO

Software Engineer

michaelsabado.ms04@gmail.com | [michaelsabado.github.io](https://github.com/michaelsabado)

SUMMARY

Full-stack Software Engineer with experience designing, developing, and maintaining scalable, database-driven web applications. Skilled in building APIs, implementing business logic, and delivering reliable solutions in collaborative team environments. Committed to clean code, continuous improvement, and learning modern technologies.

PROFESSIONAL EXPERIENCE

YNS Philippines – Makati City, Philippines

– Software Engineer II

February 2024 – Present

- Participated in the full development lifecycle of web applications, including feature implementation, workflow optimization, and system enhancements
- Developed backend and frontend components, integrated system features, and assisted in project setup and task coordination
- Conducted debugging, testing, code review, and post-deployment verification to ensure system stability
- Mentored junior developers and suggested improvements to system architecture and workflows
- Communicated technical decisions with stakeholders and documented system designs, APIs, and processes

– Software Engineer I

October 2022 – February 2024

- Actively participated in the full development lifecycle of web applications, including real-time communication platforms, document management systems, framework migrations, and urgent feature enhancements
- Developed backend APIs and integrated them with responsive, interactive frontend interfaces
- Assisted in version upgrades, library updates, dependency management, and integration of third-party services/APIs
- Participated in requirement gathering, translating specifications into working code, and maintaining documentation
- Collaborated with team members in Agile/SCRUM ceremonies (stand-ups, sprint planning, backlog grooming, retrospectives)
- Maintained clean, scalable, and maintainable code under guidance from senior developers

PASCALIA Asia – Ho Chi Minh City, Vietnam

– Full Stack Developer

February 2025 – February 2026

- Developed full-stack features for a global e-commerce system, covering admin and customer modules
- Implemented RESTful APIs and backend services to support new platform functionalities
- Enhanced system scalability and maintainability through feature improvements and refactoring
- Analyzed and resolved production and development issues through root cause investigation
- Worked closely with the team on continuous testing, integration, and feature deployment

PROJECT EXPERIENCE

PSU School of Advance Studies – Project Lead Developer, Internship

February 2022 – June 2022

- Actively contributed to the full software development lifecycle as technical lead and full-stack developer
- Defined system architecture, database design, and UI standards for the application.
- Developed backend logic and frontend interfaces to support automated queue processing
- Led debugging, testing, and quality assurance efforts prior to release
- Handled deployment, monitoring, and post-deployment issue resolution

PSU Urdaneta – University Extension Project

May 2021 – September 2021

- Developed and maintained web application components following project requirements
- Implemented dynamic features for TOS generation and online examination modules
- Assisted in deployment and post-deployment issue resolution
- Worked closely with the team to deliver features within project timelines

TECHNICAL SKILLS

- Languages & Web Technologies:** PHP | JavaScript | TypeScript | Node.js | HTML5 | CSS3
- Frameworks, UI & Styling:** Laravel | Vue.js | jQuery | Bootstrap | Tailwind CSS | AJAX
- Backend, APIs & Architecture:** RESTful APIs | MVC Architecture
- Cloud, DevOps & Databases:** AWS (EC2 | RDS | S3 | Lambda) | Docker | MySQL
- Tools & Version Control:** Git | GitHub | Bitbucket | Postman

EDUCATION

BA Information Technology

August 2018 – August 2022

Pangasinan State University - Urdaneta Campus

- Graduated with Honors
- Best in Capstone Project
